1. Graduation Rate is the number of Graduates divided by the Number of Students Available for Graduation.
2. Number of Graduates Available for Employment means the number of graduates minus the number of graduates unavailable for employment. Graduates unavailable for employment are those graduates who fall into one of the following categories: death, incarceration, active military service deployment, the onset of a medical condition that prevents employment, international students who have returned to their country of origin, or graduates who are continuing their education in an accredited institution of higher education (postsecondary) on at least a half-time basis.
3. Percentage of Graduates Employed in the Field is calculated by dividing Graduates Employed in the Field by the Number of Graduates Available for Employment. Graduates Employed in the Field means graduates employed in jobs for which the program trained them.
