LABORATORY-GROWN DIAMOND SERVICES

GIA laboratory-grown diamond services include an overall quality assessment for laboratory-grown diamonds. The GIA assessments for laboratory-grown diamonds have a distinct format to fully differentiate them from reports for natural diamonds. The laboratory-grown diamond's girdle is laser inscribed with "Laboratory-Grown" and the GIA quality assessment number.

LABORATORY-GROWN QUALITY ASSESSMENT

GIA's Laboratory-Grown Diamond Quality Assessment provides an overall quality evaluation of loose, laboratory-grown diamonds. Each diamond is classified as either **Premium** or **Standard**, based on its criteria. This service applies to colorless to near-colorless laboratory-grown diamonds weighing 0.15 carats or more. Each diamond's girdle is laser inscribed with the term "Laboratory-Grown" and the GIA quality assessment number.

- Pricing is determined by multiplying the total carat weight by the cost per carat. A minimum fee applies to each stone submission, as outlined below.
- Stones must be submitted in clean, unmarked parcel paper. Failure to comply will result in an additional fee.

Item	Fee
Cost Per Carat	R240
Minimum Fee, per stone submission	240
Rejection Fee	80
Unmarked Parcel Paper Fee, per stone	50
