NATURAL COLORED DIAMOND REPORTS

GIA Colored Diamond Reports include testing to determine whether material is a diamond, whether it is natural or laboratory-grown, and describe the color origin and color grade for colored diamonds. 4C's quality assessment includes diamond color grade, clarity grade, carat weight and only for standard round brilliant - cut grade. All diamonds are tested for laser drilling fracture filling and color treatments. Diamonds found to have undergone a color treatment will have the girdle inscribed with "TREATED COLOR" and be charged the appropriate fee. See inscription fees on page 2. Grading and laser inscription services are performed on loose diamonds only. Identification and origin services will be performed on loose or mounted diamonds.

COLORED DIAMOND GRADING REPORT
