

## PEARL REPORTS

GIA Pearl Reports provide information on the identity of pearls (natural or cultured), the mollusk (when determinable) they originated from and the environment they formed in (saltwater or freshwater), and also state whether the pearls have undergone treatment, as well as providing classification information based on the GIA 7 Pearl Value Factors, depending on the service type chosen.

### PEARL IDENTIFICATION REPORTS

The following services may apply to Pearl Identification Report or Pearl Identification & Classification Report requests. GIA will contact you prior to proceeding with these services and fees.

### RANDOM SAMPLE

Report issued on a small sample of pearls from the same item. Only applicable for items where it is not possible to test all pearls. Pricing varies, a quote will be provided after evaluation.

Minimum Fee      ¥31,900

### CT ANALYSIS

Examination of the internal structure of loose pearls in cases where additional information to the standard real-time microradiography testing proves inconclusive. Strands and necklaces only.

Minimum fee in addition to report fee      ¥255,200

### MIXED PEARLS SEPARATION

Necklaces or strands where standard identification testing shows there is a mix (20% or more of a different "type") of natural and cultured pearls or untreated and treated pearls (specifically modified color) and where the client chooses to separate the pearls rather than opt for a more generically worded report (i.e. stating "contains cultured pearls" or "mixture", etc.). The pearls will be returned loose when necessary.

Minimum fee in addition to report fee      50% of the original report fee

## ADD-ON SERVICES

GIA Add-On Services must accompany a Report Service or Follow-Up Service unless otherwise indicated.
