### Patents

- Glass A.M., Lines M.E., Nassau K. (1978) *Amorphous Metal Oxide Material Between Electrodes of a Cell*. United States Patent 4130694.
- Glass A.M., Lines M.E., Nassau K. (1981) *Electrical devices including electrode-bearing amorphous solid material*. European Patent 0000785.
- Johnson L.F., Nassau K. (1965) *Optic Maser Using Trivalent Neodymium Ions in a Calcium Tungstate Host*. United States Patent 3225306
- Johnson L.F., Nassau K. (1966) *Optical Maser Comprising the Active Medium*. United States Patent 3248668.
- Lenzo P.V., Nassau K., Spencer E.G. (1970) *Optical beam deflection utilizing LiNbO<sub>3</sub> or LiTaO<sub>3</sub>*. United States Patent 3495894.

- Levinstein J.H., Nassau K. (1967) *Growth of Lithium Niobate Crystals*. United States Patent 3346344.
- Levy R.A., Nassau K. (1988) *Contact vias in semiconductor devices*. United States Patent 4733291.
- Lines M.E., Lyons K.B., Miller A.E., Nassau K. (1988) *Apparatus comprising Raman-active optical fiber*. United States Patent 4790619.
- Loiacono G.M., Nassau K. (1968) *Lithium Meta-Niobate Crystalline Growth From Melt Containing Magnesium Oxide*. United States Patent 3418086.
- Nassau K. (1966) *Optical Maser Comprising the Active Medium*. United States Patent 3258716
- Nassau K. (1966) *Wavelength in microns*. United States Patent 3257327.
- Nassau K. (1971) *Method for producing potassium niobate crystals*. United States Patent 3565577
- Nassau K., Coleman T.G., Hunter C.E. (1999) *Gemstone Formed of Silicon Carbide with Diamond Coating*. United States Patent 5882786.
- Wallace W.E., Nassau K., Cherry, L.V. (1963) *Ferromagnetic Materials Prepared from Lanthanons and Transition Metals*. United States Patent 3102002.
