

**G&G Data Depository:** Rare-earth element composition of andradite from Antetazambato to accompany F. Pezzotta et al., "Demantoid and Topazolite from Antetazambato, Northern Madagascar: Review and New Data," *Gems & Gemology*, Vol. 47, No. 1, pp. 2–14.

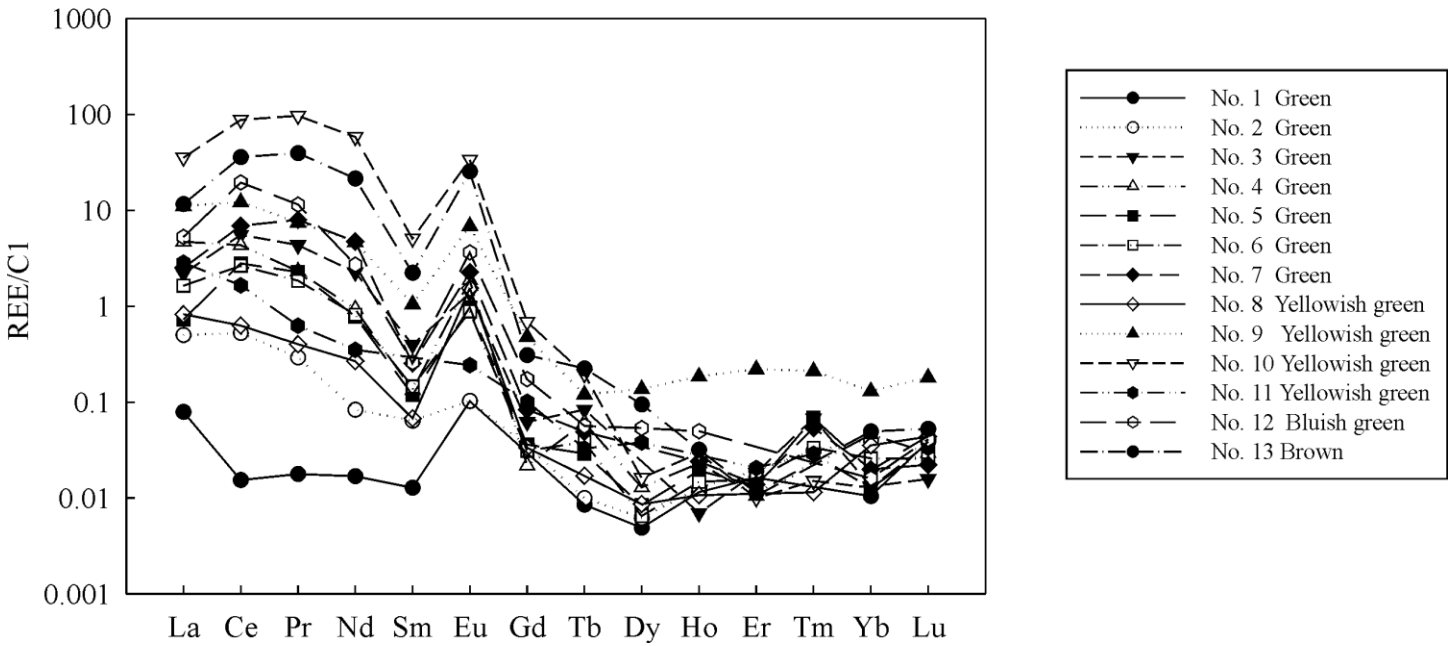

Figure DD-1. Typical of andradite, the rare-earth element composition of Antetazambato material shows enrichment in light REE and depletion of heavy REE. The data are normalized to C1 chondrite composition per standard practice.
